

PROJECT CASE STUDY

MODERN KITCHEN CABINET DESIGN & PRODUCTION DOCUMENTATION

Planning • 3D Modeling • Production Documentation • Execution

PROJECT CASE STUDY

2026

PROJECT OVERVIEW

Project Summary

This project involved the planning and production documentation of a custom kitchen cabinetry system, combining cabinet layout, 2D planning, 3D visualization and detailed manufacturing documentation.

Scope of Work

- Cabinet planning and layout
- Base, wall and tall cabinet classification
- 2D planning
- 3D modeling and technical visualization
- Cabinet body documentation
- Appearance and hardware documentation
- Cutting preparation
- Assembly documentation
- Execution documentation

Project Information

Project Type	Custom Kitchen
Scope	Design & Production Documentation
Cabinet Types	Base / Wall / Tall
Material	MDF
Documentation	Excel + PDF + Drawings
3D Visualization	Included
Execution	Completed

PLANNING & LAYOUT

Cabinet Configuration

The cabinet layout was developed to define unit positions, and functional relationships before detailed production documentation.

Figure1 — Base Cabinet Layout

Figure 2 — Lower row of Wall Cabinet Layout

Figure 3 — Upper row of Wall Cabinet Layout

VISUAL DOCUMENTATION

3D Models & Technical Views

3D models and technical views were developed to review the cabinet layout, proportions, appliance placement and overall configuration before production.

DESIGN & EXECUTION REVISION

The final executed configuration included several revisions from the original design documentation:

- **T_01 Tall Cabinet:** Four drawers were removed and replaced with a single door.
- **Dishwasher:** The dishwasher was removed and replaced with a base cabinet.
- **Entrance:** A dedicated entrance door was incorporated into the final layout.

PRODUCTION DOCUMENTATION

Workbook Structure

A structured production workbook was developed to organize project information, cabinet units, cabinet body components, appearance parts and hardware in a consistent production-oriented format.

PROJECT INFORMATION	
FIELD	VALUE
Project Name	Custom Kitchen Project
Client	Mr. Ismail
Prepared By	Hesameddin Ebadi
Project Type	Custom Kitchen Cabinet
Documentation Type	Cabinet Production Package
Overall Height	2830 mm
Total Units	27
Unit of Measurement	mm
Cabinet Body Thickness	16 mm
Date	30-Jun-26
Revision	Rev. 01
Status	Production Documentation

Figure 4 — Project Information

Unit Code	Category	Description	Height (mm)	Width (mm)	Depth (mm)	Notes
B_01	Base Cabinet		731	1100	560	
B_02	Base Cabinet	Washing Machine Unit	863	700	577	
B_03	Base Cabinet	Cooktop Unit / Drawer	731	900	560	
B_04	Base Cabinet		731	520	560	
B_05	Base Cabinet		731	520	370	
B_06	Base Cabinet		731	970	560	
B_07	Base Cabinet	Dishwasher	863	700	577	
B_08	Base Cabinet	Kitchen Sink	731	900	560	
B_09	Base Cabinet		731	370	560	
T_01	Tall Cabinet	Drawer / Oven	2630	600	580	
T_02	Tall Cabinet	Refrigerator	750	1416	400	
T_03	Tall Cabinet		2630	500	580	
T_04	Tall Cabinet	Coffee Bar	2630	1000	450	
W1_01	Wall Cabinet		820	870	330	
W1_02	Wall Cabinet		820	1220	330	
W1_03	Wall Cabinet	Range hood	820	870	330	
W1_04	Wall Cabinet		820	870	330	
W1_05	Wall Cabinet		820	1220	330	
W1_06	Wall Cabinet		820	870	330

ASSEMBLY DOCUMENTATION

Construction Details

Figure 9 — Wall Cabinet

Figure 10 — Base Cabinet

Assembly Reference

CABINET DOCUMENTATION • FABRICATION & ASSEMBLY

Project Overview

This guide provides fabrication instructions, material specifications, edge-banding requirements , and assembly notes for cabinet production.

Cut list dimensions are calculated based on a 16 mm sheet thickness. These dimensions may vary depending on theProject.

The dimensions shown in the drawings are based on the standard configuration and a total height of 2400 mm.

Cabinet Identification System

Each cabinet unit is identified by a unique code.

Base cabinets: B_01, B_02, ...

Wall cabinets: W_01, W_02, ...

Tall cabinets: T_01, T_02, ...

Edge Banding

Edge-banding requirements are indicated in the cut list according to the diagram below.

Figure 11 — Assembly Reference

Execution Changes

1. T_01 Cabinet

Original Design:

Four drawer fronts were specified in the original design.

Final Execution:

The four drawers were removed and replaced with one cabinet door.

2. Dishwasher Unit

Original Design:

A dishwasher was included in the original kitchen layout.

Final Execution:

The dishwasher was removed and replaced with a base cabinet.

3. Entrance Door

Final Execution:

One entrance door was added as part of the final installation.

CABINET PROJECT

EXECUTION

Final Executed Configuration

The final installation reflects the completed on-site configuration following revisions made during execution.

Figure 12 — Final Executed Configuration: Revised T_01 tall cabinet and base cabinet replacing the original dishwasher position.

Figure 13 — Final Entrance Door Installation and Completed Kitchen.
